

Early Childhood Education AAS

Liberal Arts & Transfer Studies Division

Program Description:

The Associate in Applied Science in Early Childhood Education degree consists of 60 credit hours and is approximately one half of the curriculum required for a Bachelor of Arts in Education. The degree is designed to allow the holder to serve in a support capacity including, but not limited to, facilitating instruction and direct or indirect supervision of pupils under the direction of an educator. This program is designed to allow a seamless transfer to the baccalaureate degree at Marshall University, or a seamless transfer to Bachelor of Applied Science.

Career Description:

Childcare workers nurture and care for children who have not yet entered formal schooling and also work with older children in before- and after-school situations. These workers play an important role in a child's development by caring for the child when parents are at work or away for other reasons. In addition to attending to children's basic needs, childcare workers organize activities that stimulate children's physical, emotional, intellectual, and social growth. They help children explore individual interests, develop talents and independence, build self-esteem, and learn how to get along with others.

As childcare workers gain experience, some may advance to supervisory or administrative positions in large childcare centers or preschools. Often, these positions require additional training, such as a bachelor's or master's degree. Other workers move on to work in resource and referral agencies, consulting with parents on available child services. A few workers become involved in policy or advocacy work related to child care and early childhood education. With a bachelor's degree, workers may become preschool teachers or become certified to teach in public or private schools. Some workers set up their own childcare businesses.

Career Outlook:

High replacement needs should create good job opportunities for childcare workers. Qualified persons who are interested in this work should have little trouble finding and keeping a job. Employment of childcare workers is projected to increase about as fast as the average for all occupations through the year 2014. The number of women in the labor force of childbearing age and the number of children less than 5 years of age are both expected to rise over the next 10 years. There is also an increasing emphasis on early childhood education programs. There is likely to be a rise in enrollment in private preschools as the value of formal education before kindergarten becomes more widely accepted.

Salary Forecast:

For the most current salary information please refer to the Bureau of Labor Statistics "Occupational Outlook Handbook" found at www.bls.gov/ooh/.

Admission Requirements:

Students seeking admission into the Early Childhood Education (ECE) program must meet with the ECE Program Director prior to submitting the application packet. This is to ensure that students receive current information regarding the program admission requirements and the criteria for selection. Application packets are available in the Liberal Arts and Transfer Studies Office, room 329.

The following program admission requirements apply:

1. Completion of EDUC 101, EME 101, EDUC 105 and EDUC 120 with a grade of "C" or better in all ECE courses;
2. An overall GPA of 2.5 or better;
3. Completion of Federal Background Check.

Applications will be accepted beginning the first week of January of each year for the upcoming fall semester. Admission to the program will be granted starting in May of the year of application.
