

Certificate

Program Description:

One year of training at the Putnam Career and Technical Center (PCTC) and thirty-one hours credit at Mountwest Community & Technical College will result in an Associate in Applied Science degree in Dental Laboratory Technology. Students will follow the Putnam County school calendar while completing the Dental Laboratory Technology courses, and attend the PCTC every day from 8:30 a.m.-3:00 p.m. during the technical portion of the program.

Career Outlook:

Employment should increase slowly, as the public's improving dental health requires fewer dentures but more bridges and crowns. However, the employment is favorable because employers have difficulty filling training positions. The employment outlook is very good if the employees are willing to relocate.

Salary Forecast:

Median hourly earnings of dental laboratory technicians were \$14.93 in May 2004. The middle 50 percent earned between \$11.18 and \$19.71 an hour. The lowest 10 percent earned less than \$8.86, and the highest 10 percent earned more than \$25.48 an hour. Median hourly earnings of dental laboratory technicians in May 2004 were \$15.95 in offices of dentists and \$14.40 in medical equipment and supplies manufacturing.

Dental technicians in large laboratories tend to specialize in a few procedures and, therefore, tend to be paid a lower wage than those employed in small laboratories that perform a variety of tasks.

Program Admission Requirements:

The college adheres to an open admissions policy which means applicants with a high school diploma or a GED are eligible for admission. Applicants with neither a high school diploma nor a GED may be admitted on a conditional basis

Career Description:

Dental Laboratory Technicians make and repair dental appliances such as dentures, crowns, and braces. Specializations are available in various aspects of the work prescribed by dentists and orthodontists: Crown and Bridge Technicians, Metal Dental Technicians, Partial Denture Technicians, Dental Ceramists and Orthodontic Technicians. Most dental laboratory technicians work in commercial dental laboratories employing 2 to 20 people. Employment opportunities are available in private dental offices, dental schools, hospitals, and companies that manufacture dental prosthetic materials.

Major Code – CD20
